

## e-Land Register

[E-Land Register](#) [1] is a register of ownership relations and limited real rights. It has electronic online data interchange with other basic registers, cadastre and population registry. Digital Land Register software covers the whole registration procedure and has made electronic conveyance much easier. It has improved the quality, speed and security of the process of registering titles to land.

Information in the e-Land Register has legal power and everyone can get this information over the internet. The proceeding deadlines have decreased from 3 months to approximately 10 days because it is paper free. Notaries and other officials get all the necessary information from e-Land Register electronically.
