

Company Registration Portal

The Company Registration Portal is an environment which allows companies to submit documents to the Business Register electronically, without the need to use a notary's services. The portal allows submitting applications for registering a new company, amending registry data, liquidating a company and deleting a company from the registry. You can also prepare and submit annual reports via the portal.

Every citizen can log into the Company Registration Portal and use the portal. It is possible to log in using Estonian, Latvian and Belgium ID card or Estonian and Lithuanian Mobile ID. It is also possible to log in with Finnish ID-card and Smart-ID, but it is not possible to sign petitions and annual reports with these cards.

Possibilities offered by the Company Registration Portal:

- **Registering a new company** – a business association, a self-employed person, a non-profit association, state and local government agencies can be electronically registered in the Company Registration Portal if all persons related to the company (Board Members, founders, Council Members, etc.) have ID cards. Registration applications can be submitted via this portal by persons having an Estonian, Latvian, Belgian ID card or Estonian or Lithuanian Mobile ID.
- **Changing the data of a company** – the portal allows electronic submitting of changing, liquidating and deletion applications to the Business Register. The applications must be digitally signed with the ID card upon submitting them.
- **Notifying about field of activities of a company** – the Company Registration Portal can be used for notifying the registrar about changes in the primary field of activities by only self-employed persons and general and limited partnerships who are not required to submit annual reports to the registrar. Business associations can submit their field of activities and changes thereof only with their annual reports.
