

International

The Centre of Registers and Information Systems (RIK)

RIK is a state agency under the jurisdiction of the Ministry of Justice of Estonia with the aim to establish an innovative environment providing integrated e-services for a more efficient implementation of state administration, legal and criminal policy. RIK has developed and administers over 80 different systems and various registers important both for the state and the citizens.

International collaboration

RIK is an experienced public sector developer, manager and administrator of IT-systems. Our e-solutions have caught the interest of other countries and we are constantly expanding our international collaboration. We receive some 30 foreign delegations at RIK each year and have participated in cooperation projects with the Sultanate of Oman, the autonomous region of Kurdistan in Iraq, the Republic of Kosovo and a successful finished collaboration with Bulgaria etc.
